This is UNEVALUATED Information

25X1

In November 1952

25X1

25,000 concrete stanchions and 350,000 concrete slabs had been ordered by the Soviet Army from various East German concrete plants. The Gerwisch Concrete Plant had to deliver 50,000 concrete slabs by late December 1952. The slabs ordered measure 250 x 50 centimeters. The stanchions have the shape of an A and were $3\frac{1}{2}$ meters high and are designed to be connected by seven concrete slabs. The space between the slabs is to be filled with sand bags and earth.

1. Comment. The existence of a Gerwisch Concrete Plant in Magdeburg is unknown. A town by the name of Gerwisch is located about nine km northeast of Magdeburg. It is possible that the plant referred to in the present report is located at Gerwisch.
